through the fields a portion of the way

the ice is drawn comfortably on sleds but

the sleighing is anything but good.

Dealers in marble not only in this

vicinity but all over the country have

combined for mutual benefit and protection. A uniform list of prices somewhat

in advance of the old lists has been adopted

and smaller discounts and less credits

will be given. The new arrangement

cannot be beneficial to marble pro-

ducers as well as dealers if they will only stick to it. There is always more or

less temptation to "cut unders" in rates

but in order to make the combination

good for anything the schedule rates

should be rigidly adhered to.

The usual session of school at the

Seminary was omitted on Friday, the

principal being absent to fill an appoint-

ment at the Otter Creek Valley Teacher's

Association at Duxbury. We copy from

the *Rutland Herald* the following in

relation to the exercises Rev. P. S.

Patt, of Duxbury, read a paper on "The

Needs and Methods of Moral Training in

Schools." Mr. Pratt showed in a clear,

logical style the need of moral training

in preparing children to properly fulfil

their duties as citizens of the State. The

value of moral training during school

days is of particular value because the

child is then early influenced; because

some pupils receive no moral training at

home, and for the reason also that the

temptations of a large schools are great.

He emphasized the necessity of securing

teachers of positive morality, but he did

not consider the study of moral sciences

of much utility. Rev. James Fischer,

principal of Burr and Burton Seminary,

Manchester, was introduced and proceeded

to give a most excellent address upon

"The Consequences or Equivalents of

the Teacher." The address was one of

great merit in its tone and spirit, and was

delivered with grace, earnestness and

power.
